

Wichita Livestock Sales Co., LLC

Value Added Program Outline

Wichita Livestock strives to bring value to both our buyers and sellers through with high quality weaned calves and yearlings that have been worked and conditioned to our value added sale program.

Calves will be marketed based on information provided for genetics, backgrounding protocols, vaccines administered and any additional management practices provided.

All bull calves must be castrated and healed prior to sale

All heifers must be guaranteed open at the time of sale. Any heifers found to be bred will charged back to seller.

Calves must be home raised and weaned a minimum of 45 days

1. 2 doses viral 5 way Modified Live (IBR, PI3, BRSV and BVD Type I and II). Booster per label instructions with second round being given no later than 3 weeks prior to sale.
2. 2 doses 7-way, 8-way or 9-way clostridial
3. 1 dose Pastruella/Haemolytica Multocida
4. Internal and external parasite control administered according to label instructions.

Calves must be home raised and weaned a minimum of 60 days
